Whether we are consciously aware or not, we are all going through a period of re-birthing along with the Earth, which will continue as we move through the next few years. This is a very significant time in our history and when we are willing to go inward to find completeness we naturally assist with raising the vibration and helping the Earth to also find that completeness. Authenticity is key moving forward and each of us, including the Earth, needs to move into our authentic self, becoming once more the multidimensional, limitless being of love that we truly are.

This workshop will be channelled and experiential and will include:

- Clearing birth trauma for all lifetimes to create a space for change.
- Manifesting with an open heart to birth your new ideas.
- How we can help the Earth to rebirth herself.
